PROFESSIONAL EXPERIENCE

California Department of Industrial Relations | Quality Assurance / Salesforce Developer May 2025 – Present

- Performed quality assurance testing on a Salesforce-based application, ensuring implementations met business requirements and stakeholder expectations.
- Analyzed business requirements and user stories to develop test scenarios, identify functional gaps, and validate that implemented functionality met stakeholder expectations.
- Investigated and documented functional and technical defects, collaborating with developers to isolate issues, communicate findings, and validate fixes.
- Assessed and recommended alternative implementations when identifying defects or functional gaps, evaluating maintainability, usability, and alignment with business requirements.
- Participated in an Agile development environment through daily Scrum meetings, user story refinement, sprint reviews, and stakeholder demonstrations, collaborating with various teams throughout the software development lifecycle.

OEE Intellisuite | Full Stack Developer

Feb 2025 – May 2025

- Executed end-to-end migration of a legacy C# web application to a modern stack (React, Typescript, ASP.NET Core), reducing technical debt through code refactoring and following React best practices.
- Spearheaded the development of a prototype for a new feature on the flagship product, enhancing its value proposition and receiving enthusiastic feedback from clients.
- Designed and developed reusable React components with Typescript and Shadcn, improving UI consistency and reducing front-end development time for other product teams.
- Worked with QA and product managers in Scrum sprints to prioritize modernization tasks and new features.

Mergen | Frontend Software Engineer Intern

July 2024 – Feb 2025

- Translated Figma designs into pixel-perfect web pages using React, Next.js, Tailwind CSS, and Typescript.
- Developed a full-feature text editor with React and Slate.js allowing students to write, format, and share essays. Integrated commenting functionality using Zustand for a lighter state management solution.
- Created a web scraping Python script using the Pandas and Requests libraries to collect essay prompts and other data from 328 colleges.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Typescript, SQL, Python
- **Frameworks:** React, Next.js, Node, Express
- **Tools:** Git, VS Code, Postgres, MongoDB, Docker, Figma, Webflow, Salesforce
- **Libraries:** Zustand, Tailwind CSS, Shadcn, Passport.js, JWT, Drizzle ORM

EDUCATION

University of California, Davis

Sep 2019 – Jun 2023

Bachelor of Science in Computer Science

PROJECTS

Tournament Bracket App

Oct 2024 – Apr 2025

- Developed a full-stack bracket builder web app using React, Node/Express, and Supabase, streamlining the creation, scheduling, and updating of tournament brackets.
- Utilized Zustand for client-side state management and Tanstack Query for data-fetching, ensuring a responsive interface and maintainable front-end architecture.
- Utilized Supabase database and user authentication features, such as RLS policies, database triggers, and Social Auth Providers, ensuring that users seamlessly fetch and manage their own data.
- Designed the user-interface using Figma, focusing on creating reusable UI components for consistent styling. Established local styles to standardize typography, color schemes, and spacing, ensuring a cohesive look.
